

This compact unit is designed for use on the rig floor and using the latest receiver technology provides a 90 % or higher confidence of data received. Stringent filtering and fast data presentation give the operator reliable information to keep the drilling operation moving. The wireless receiver can be set up quicker than traditional wired systems and can operate in a more flexible environment where cables might be challenging. The unit is available for indoor or outdoor operation.

Features:

- 15" sunlight readable auto dimming display
- Works with most popular directional tools
- Can be run in wired and wireless mode
- Operating temp of -40 C - +50 C
- Application software pre-loaded

- UL and CSA Class 1 Division 2 certification
- High resolution scratch resistant touch screen
- All decoding done on rig floor, no requirement for an SAI
- Operating power 90 - 260 VAC, 47 - 63 Hz 250 VA
- Humidity 5-100 %

Benefits:

High MTBF	Long service life
Maintenance free	Durable construction
Compact size	Light weight
Familiar operation	Quick setup

Displaying:

Inclination	Azimuth
Toolface	Mag Field
Gravity Field	Dip Angle
Gamma	Bit Depth
Pump Pressure	Pump status
