

Typical uses for Gamma

- Formation evaluation while drilling
- Formation geology correlation
- Formation identification

Features

- Compatible with industry standard GE / Tensor platform
- Low power consumption
- Fully Retreivable
- Focused available
- Azimuthal available

Specifications

Diameter	4.70cm
Length	86cm
Weight	7kg
Temperature	-40c - 175c
Pressure	18,000 PSI
Accuracy	+/-5% (150c) +/-10% (175c)
